

Full Kit

- **Did you know that handwashing is the simplest, most effective defence against food poisoning?**
- **Do you know how well you wash your hands?**
- **You will if you do the Glitter Bug®!**

The GlitterBug® fluorescing powder and potion are used to represent 'pretend' bacteria. They show as white, bright spots under long wave UV light.

The Handwashing Kits are cost-effective, fun to use and let your staff "learn by doing".

Full kit contains:

- 1 x 240ml GlitterBug® potion
- 1 x 70g GlitterBug® powder
- 1 x 6 inch (135mm) UV torch*
- 1 x Food Stars ball
- 1 x Trainers Guide

**\$99.00
inc GST**

Potion Mini-Kit

GlitterBug® potion is great for showing how to wash hands effectively.

A little potion goes a long way and the 240ml bottle is enough for over 200 applications.

Just put a little of the potion on your hands and rub it in. Then go and wash your hands.

After washing your hands, place them under the UV light. Lo and behold - all the parts you have not washed effectively show up as little white spots.

Potion mini kit contains:

- 1 x 240ml GlitterBug® potion
- 1 x 6 inch (135mm) UV torch*

**\$66.00
inc GST**

Powder Mini-Kit

GlitterBug® powder can be used effectively with a ball or papers to demonstrate cross contamination - a concept that is sometimes difficult for food handlers to grasp.

One bottle of powder is enough for hundreds of illuminating demonstrations.

Just place a little powder on your hands and rub them together. Pick up a plastic ball and throw it to all staff members in turn. Pass the UV torch over everyone's hands and hey presto - white dots will show on the hands where they have touched the ball.

Powder mini kit contains:

- 1 x 70g GlitterBug® powder
- 1 x 6 inch (135mm) UV torch*

**\$66.00
inc GST**

* 4 x AA batteries are required for torch. These are not included in the kits due to postal regulations

Credit card facilities available. Prices quoted are in Australian dollars and do not include postage and packing.

Trainer's Kit

The Trainer's Kit contains a full kit with a viewing box. The specially designed, core flute, black viewing box is ideal for use in light rooms or when you do not want participants to handle the UV torch. The box dimensions are 315mm x 215mm x 210mm.

The UV torch is strapped inside the box and switched on. Participants put their hands in the two holes on the side of the box and look through the top opening to see their Glitterbug® results.

**\$125.00
inc GST**

The viewing box may be purchased separately for \$33 including GST, or purchased with a torch for \$55 including GST.

Replacements/Extras

The following products may be purchased individually:

- Potions
- Powders
- Torches*
- Viewing box

**\$33.00 each
inc GST**

* 4 x AA batteries required for torch.

*These are not included due to postal regulations.
Prices do not include postage and packing.*
